TSM-1100 Facing Machine .125" to 1.125" Tube

Machine Kit with Heavy Duty Case

(OD MOUNT BATTERY OPERATED)

TSM-1100 is one of the smallest designed facing tools on the market today. The machine is powered by an air-cooled 18V-Li Metabo battery motor and the total working weight of the machine is 6 lbs. The design of this machine makes it easy to use on job sites, making hard-to-reach areas easily accessible due to its small size.

It has a battery-powered motor, which will last for 2+ hours, with a 15 min. recharge. Collets are made from Aluminum material and are self-locking into the cutter to hold the collets in place.

FEATURES / BENEFITS

- 18V Metabo air cooled Li powered battery motor
- Easy replacement of collets and size ranges
- Uses Aluminum collet set (upper / lower)
- 6 lbs. (2.6 kg) approximate working weight
- Faces most metals and plastics, including high nickel materials
- Battery charger: 110V;60Hz US Style / 220V;50Hz CE Compliant
- Tool bits are designed to work on the following materials: stainless steel, inconel, hastelloy, carbon steels, aluminum and other alloys
- Options: additional batteries can be purchased

TOOL BIT

TB-1515-LC with Macro Coating
